Semarchy

MDM & DATA
INTEGRATION

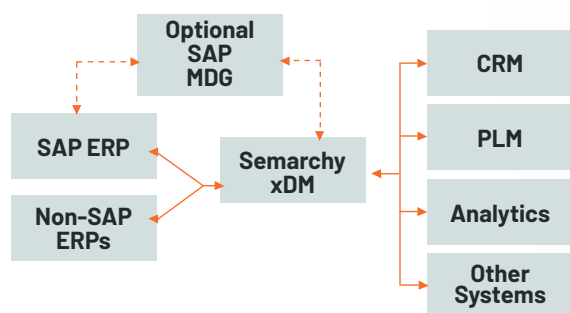

Choose the powerful combination of APGAR and Semarchy for your data management needs. APGAR and Semarchy are Gartner-recognized leaders in data and analytics. As strong partners, APGAR has 30+ data engineers trained on Semarchy's xDM and xDI solutions and brings experience with complex, multi-domain MDM projects to accelerate delivery using preconfigured solutions.

APGAR leverages Semarchy's robust capabilities while following best practices and is committed to supporting clients throughout their data journey with end-to-end services from advisory to managed services. With expertise in key areas like data architecture, integration, and MDM, plus a global delivery model, APGAR and Semarchy deliver proven results.

Overcoming Business Challenges with our SAP Business Solutions.

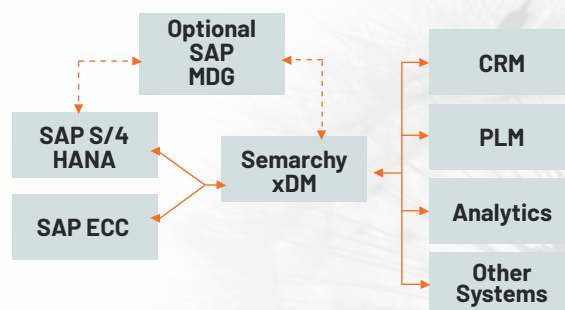

Ensuring data accuracy and consistency, supporting complex migrations, and adapting to market changes are essential for maintaining a competitive edge. APGAR understands these challenges and offers specialized SAP Business Solutions to streamline and enhance your Master Data Management (MDM) initiatives across **Business Partner, Finance, and Material domains**.

Multiple ERP Ecosystems

In ecosystems with multiple ERPs, Semarchy xDM can be a critical element integrating SAP with non-SAP ERP and easily integrate with various enterprise systems. MDG can optionally (but not necessarily) be leveraged for managing SAP data. Data can be unidirectional or bidirectional, with Semarchy xDM directly updating data in SAP.

SAP S/4 Migration Ecosystems

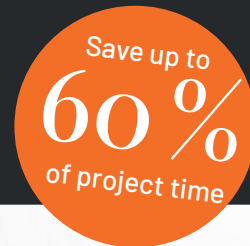

In ecosystems with only SAP, Semarchy xDM has proven to have two key benefits: 1) to make it transparent to enterprise systems whether data is coming from already migrated SAP systems or legacy SAP, and 2) to ensure easy connectivity of SAP master data to non-SAP systems. MDG can be optionally leveraged for SAP data governance.

*In case there are multiple SAP S/4 instances, multiple instances of SAP MDG may be required.

“It is an efficient starter kit to customize the solution. At L’Oréal, Finance project was always among the first teams to finish the design and implementation phases.’

Corinne Dreuilhet

MDM Solution Expert at L’Oréal

Transform Your Data Management.

APGAR’s SAP Business Solutions are designed to help you overcome your most pressing data management challenges by maintaining core domains such as Business Partner, Finance, and Material. For each of these domains, we also ensure robust management of reference and organizational data to guarantee accurate, consistent, and trusted information across your operations. By leveraging our Business Solutions, you can streamline your MDM processes, improve data quality, and achieve a faster, more efficient implementation.

STREAMLINED IMPLEMENTATIONS

APGAR SAP Business Solutions significantly reduce the initial setup time, enabling organizations to jumpstart their MDM projects. By leveraging pre-built data models and workflows, companies can achieve faster and more efficient implementations.

FLEXIBILITY AND CUSTOMIZATION

Ensuring high-quality, consistent, and accurate data is at the core of APGAR SAP Business Solutions. This leads to better decision-making, operational efficiency, and compliance with regulatory standards.

ENHANCED DATA QUALITY

Our Business Solutions are designed to seamlessly integrate with your organization’s unique processes, systems, and business requirements. This flexibility ensures that the solution can be tailored to meet specific needs, whether managing customer and supplier data, financial information, or product details.

SEAMLESS INTEGRATION WITH SAP ERP

Specifically optimized for organizations using SAP ERP, our Business Solutions support both those in the process of migrating to S/4HANA and those already on the platform. We also ensure easy integration of SAP and non-SAP data within the same domains and structures, enabling unified, consistent data management across your systems.

SCALABILITY AND ADAPTABILITY

As your business grows and evolves, APGAR SAP Business Solutions provide the scalability needed to support new markets, product lines, and organizational changes. This adaptability is crucial for responding to dynamic market conditions and ensuring long-term success.

A 3-LAYERED APPROACH

Our model combines a strong foundational platform, a pre-configured solution layer with Apgar’s Business Solutions, and a final customization layer tailored to your needs. This structure ensures fast deployment, flexibility, and alignment with your business goals—making your MDM journey smoother and more effective.
