

# ApgarIA: Intelligent Agents for Operations

Maximize Efficiency. Minimize Costs.  
Transform Operations.

ApgarIA is an AI-first solution built for operations leaders seeking faster, more accurate planning and execution. From demand forecasting to production scheduling and decision support, ApgarIA delivers measurable impact by reducing costs, increasing agility, and improving overall efficiency.

## Key Business Impact

- **Lower Holding Costs** – Cut inventory excess and free up working capital.
- **Higher Customer Satisfaction** – Improve availability and ensure on-time delivery.
- **Higher Profit Margins** – Align supply with demand to reduce waste.
- **Faster, Smarter Planning** – Automate scheduling and reduce planning time drastically.
- **Lean, Cost-Efficient Operations** – Minimize downtime, changeovers, and excess stock.
- **Empowered Operations Teams** – Give every user instant access to expert knowledge.

## AI-Optimized Production Scheduling & Capacity Studies

### Faster, Smarter, More Efficient Planning

Planning inefficiencies cost time and money. ApgarIA leverages AI and constraint programming to:

#### Automate & Optimize Schedules

Reduce idle time and increase production output.

#### Minimize Changeovers

Cut unnecessary production changeovers by up to 30%.

#### Reduce Warehouse Stock

Maintain optimal inventory levels with smarter planning.

#### Optimize long term supply planning

Reduce the long-term resources requirements with long term production planning optimization.

# AI-Powered Demand Forecasting

## Turn Forecasting into a Competitive Advantage

Traditional forecasting methods often rely on historical trends, missing key external and operational factors. ApgarIA's AI-driven forecasting brings:

### Advanced Machine Learning Models

Pre-built statistical models, advanced machine learning models, and more.

### Scenario Analysis

Create and compare different forecasting scenarios and generate supply demand plans.

### Accuracy visibility and improvement

Evaluate forecast performance and identify improvement opportunities.

# AI Virtual Assistant for Operations

## Empower any user to become an Operations Expert

Technicians and operators waste valuable time manually searching for critical operational information, slowing operations and often leading to errors. ApgarIA's AI Operations Assistant eliminates these inefficiencies by providing:

### Instant Answers

Retrieve key insights from internal and external data sources.

### Context-Specific Responses

AI trained on your unique operations documents and data.

### Increased Efficiency

Reduce manual research time for content and data, improve decision-making.

## Why ApgarIA?

AI-Powered. Modular. Scalable

- **AI-Native & Future-Proof** – Built with Generative AI and Agentic AI for fast-response supply chain optimization.
- **SAP-Optimized** – Pre-integrated for rapid deployment and immediate value.
- **Modular & Scalable** – Start small, expand seamlessly.
- **Agile & Cost-Effective** – Quick Proof-of-Value, lower costs, and faster ROI than alternative solutions.

## ABOUT APGAR

APGAR designs and delivers innovative data and AI solutions and supports clients with expert advisory services to ensure successful adoption and long-term value. With a team of over 230 data and AI experts, APGAR combines product development, integration, and advisory capabilities to help companies turn data into a strategic advantage.
